The Histochemical Society, owner of the *Journal of Histochemistry & Cytochemistry*, is a not-for-profit organization of scientists devoted to fostering developments in molecular and cellular morphology. The Society supports scientific meetings and publications that emphasize the use of molecular and morphological techniques. The Histochemical Society increases the knowledge of the interrelationship of the chemical constitution and detailed morphologic structure of living organisms, both in normal and pathological states. Since 1953, the *Journal of Histochemistry & Cytochemistry* has continually published many firsts in cell biology through the Society's print and online journal. This fundamental dissemination of research will carry forward into the future.
